# SkyWave

## SkyWave IsatM2M and DMR-800D

- Pioneer of low-cost global telematics
  - 10+ years experience operating D+ network
  - Part of the initial team who designed D+ with Inmarsat
  - Delivering 6<sup>th</sup> generation of reliable, low-cost terminals
  - Part of the team who designed IsatM2M based on D+ success
  
- Privately held with stable financial operation
  
- Headquarters in Ottawa, Canada
  - Sales offices in Mexico, Brazil & Hong Kong
  
- 70 employees
  - Direct support in English, Spanish, Portuguese, Chinese, others

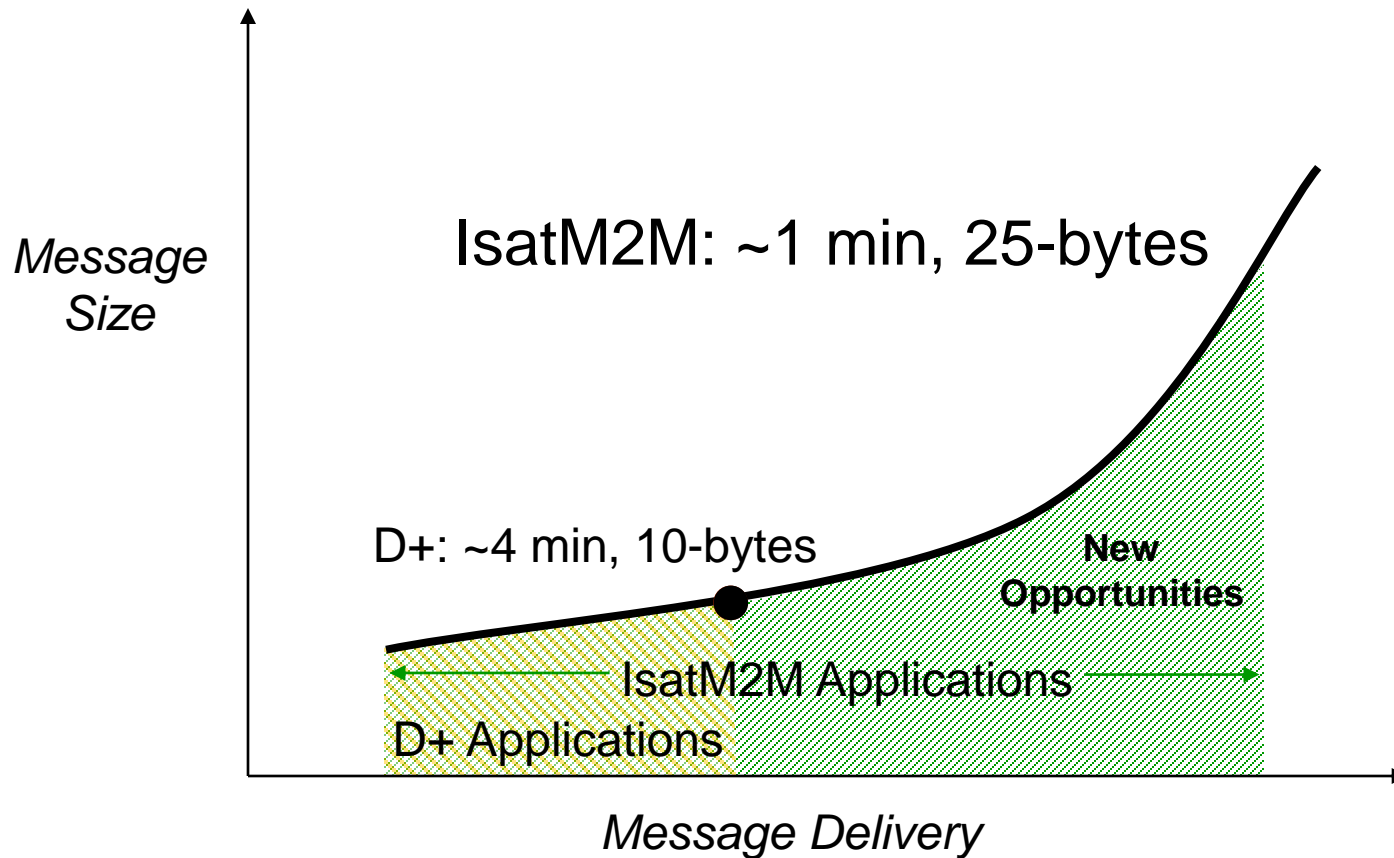

## By Quality and Quantity, the Global Leader in D+ Terminals and Network Services

## Proven, Experienced, Stable & Reliable

- Global Network of Value-Add Partners
  - Over 170 Channel Partners
  - Over 45 Countries served
  
- High quality, rugged, reliable products
  - Less than 1% failure rate, 5th-gen DMR-200
  - Reliable, consistent satellite service worldwide

## Working with Partners in Mutual Success

**IsatM2M creates new opportunities, enhances existing applications. Greater responsiveness**

## Reliable SkyWave D+

- Vehicle tracking (AVL)
- Vehicle security
- Canned messaging
- Fishing buoys
- Environmental buoys
- SSAS
- VMS
- Low-end SCADA
- Container tracking

## Reliable + Responsive SkyWave IsatM2M

- Enhanced vehicle security
- Freeform text messaging
- Mid-range SCADA
- Advanced fishing & environmental buoys
- Leisure marine

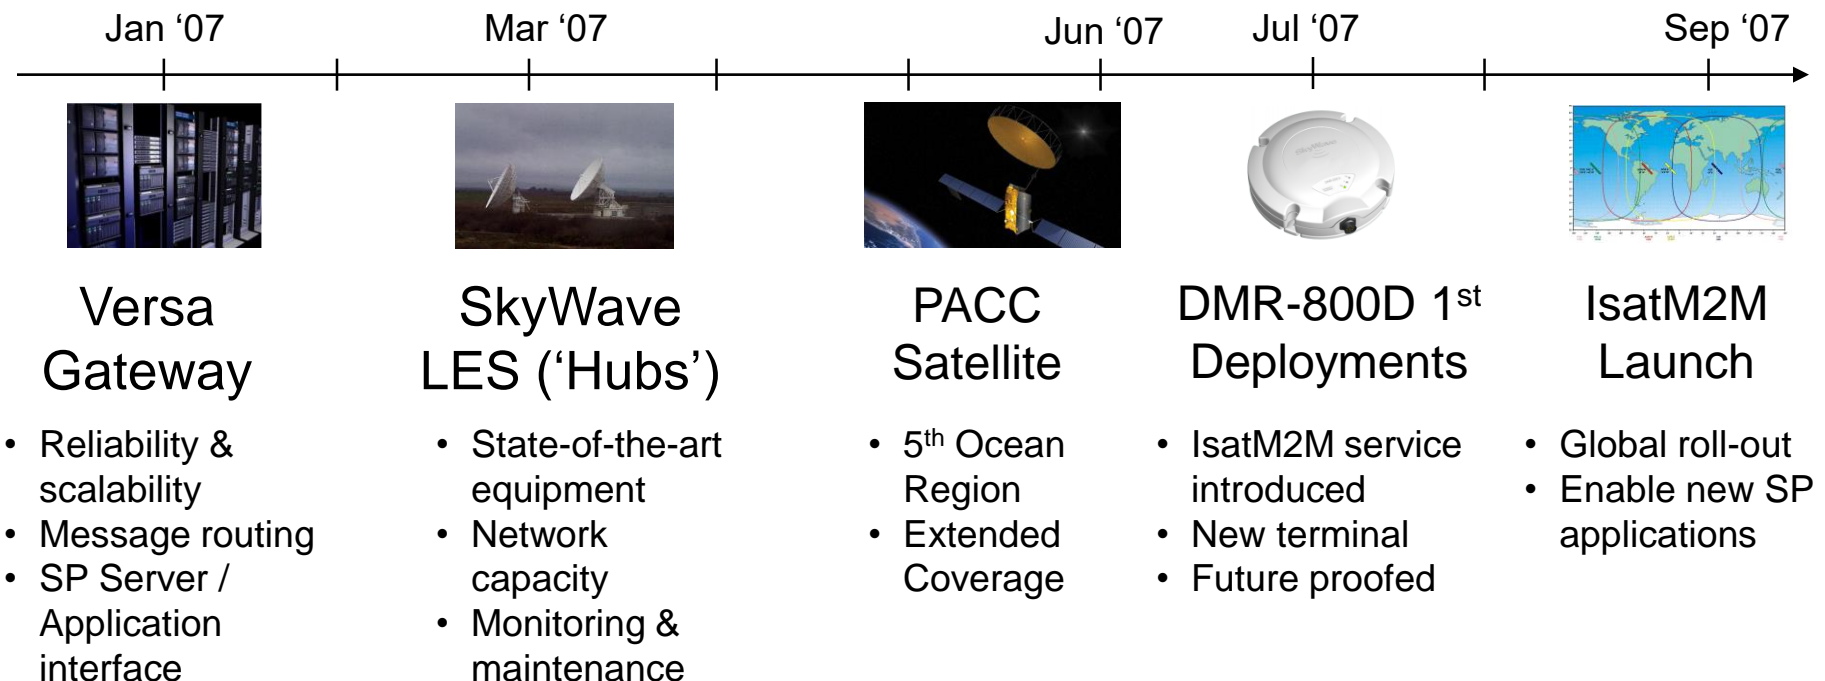

## + Flexible Satellite/GPRS

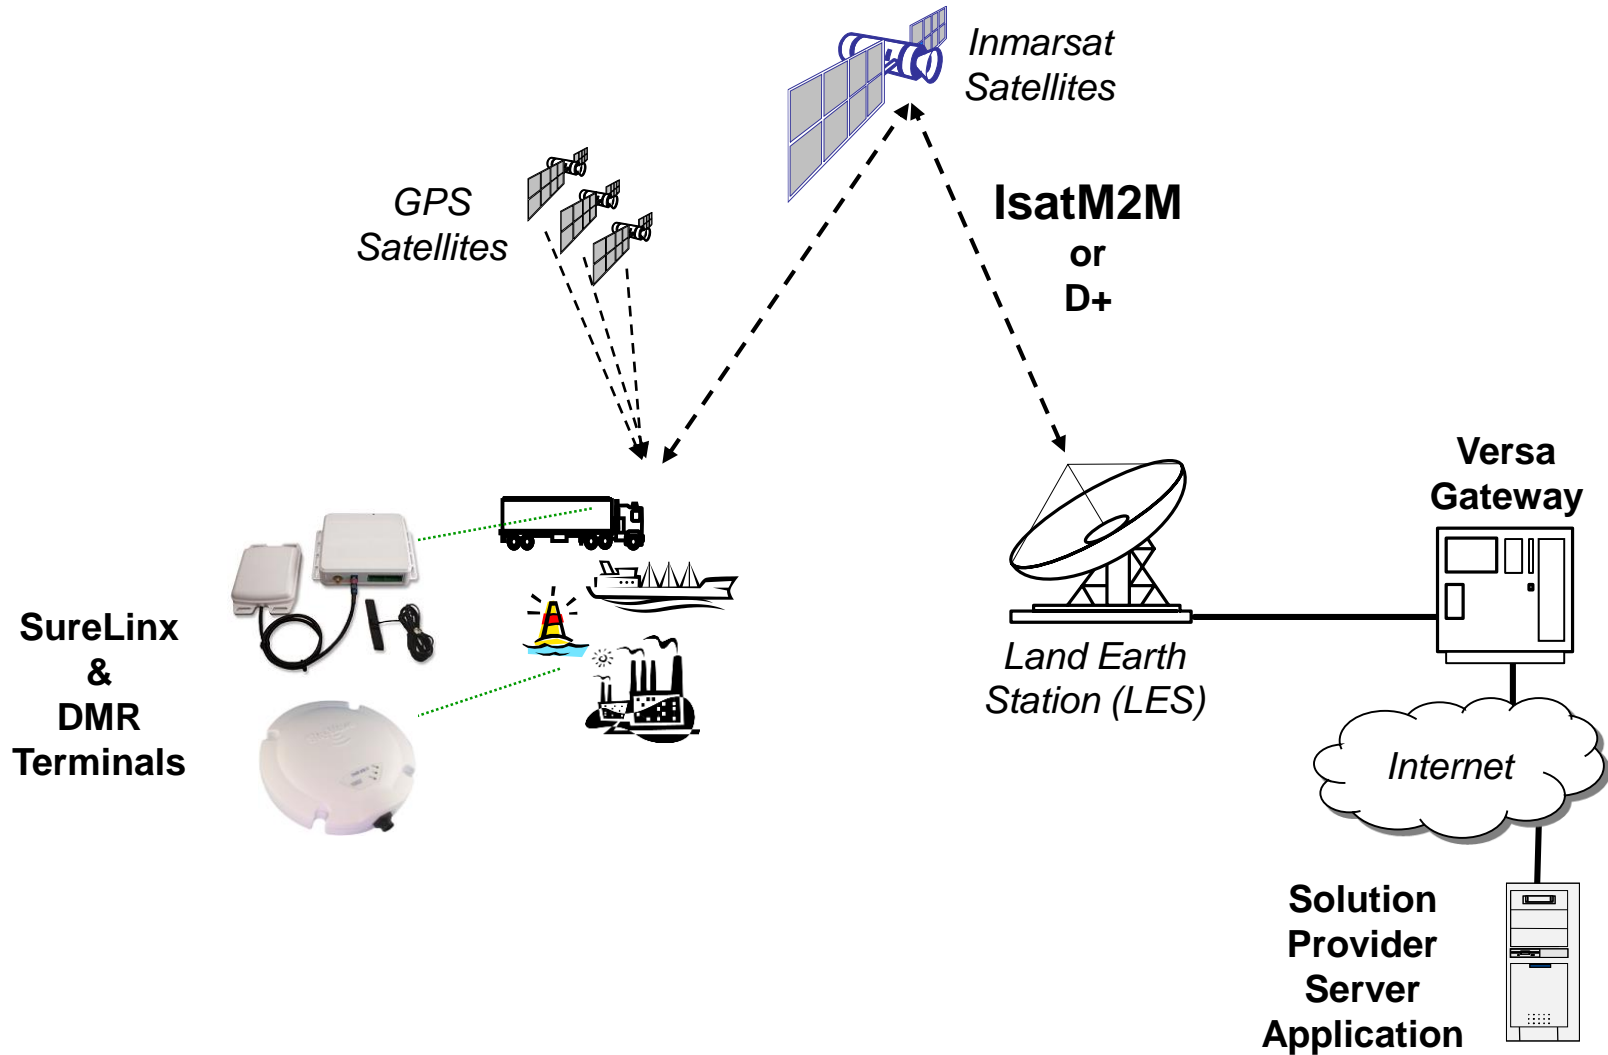

- Real-time logistics
- Driver monitoring
- Maintenance services
- Operations analysis
- Urban and remote operation
- Reliable backup communications

**SkyWave solutions leverage your D+ investment to expand into new business and applications**

- Purpose-built infrastructure for SkyWave D+ and SkyWave IsatM2M
  - Independently operated network
  - More data, faster with SkyWave IsatM2M

# SkyWave IsatM2M

- SkyWave IsatM2M
  - New enhanced service based on D+
    - 4x improved latency
    - 2.5x data payload capability
    - Over 2x low-power savings
  - More data faster = Responsive Service
  
- DMR-800D
  - Evolution of DMR-200D
    - Better antenna performance
    - 2x low-power efficiency
    - 2x processing power for feature enhancements
  - More flexibility = Responsive Applications

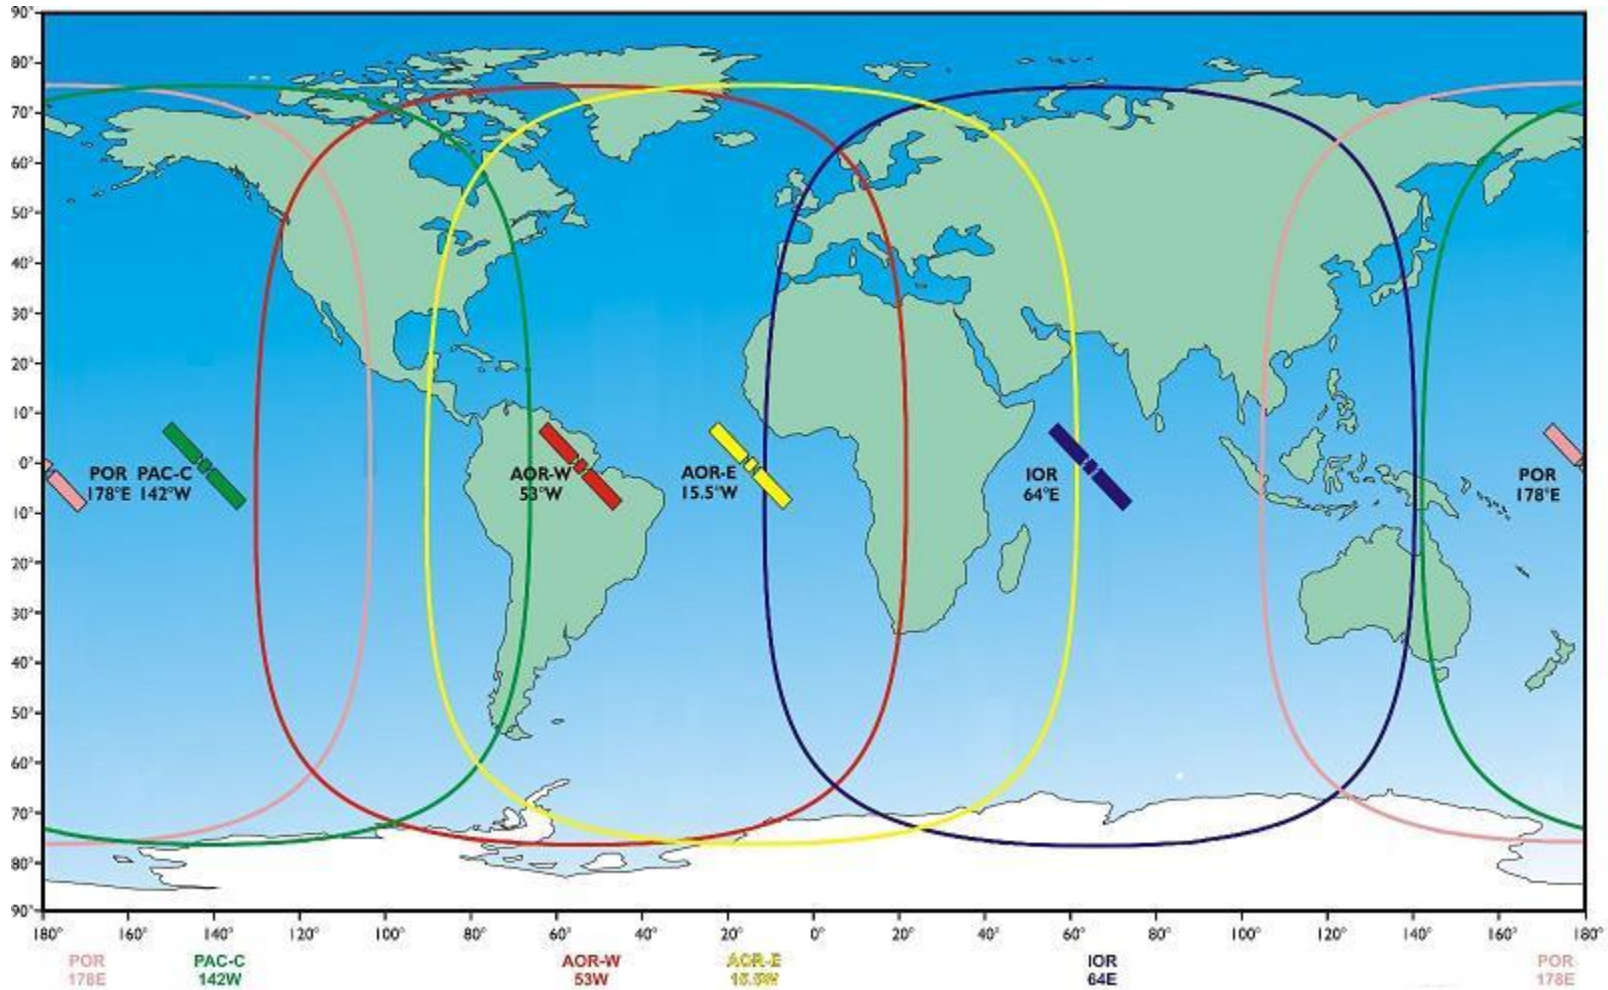

Feature	D+	IsatM2M
Frame size	2 min	30 sec
To-terminal message latency	5 min	1 min
Round-trip latency (poll/response)	6 min	1.5 min
Wake-up time to send message	5 min	45 sec
From-Terminal message size	10 bytes	10 or 25 bytes
To-Terminal message size	Up to 100 bytes	Up to 100 bytes
Coverage	Global	Global
Battery life* when sending 1 msg/day	12 months	Up to 24 months

**SkyWave D+ strong service base for existing applications;  
SkyWave IsatM2M extends to new business opportunities**

*Performance may vary with busy traffic periods*

*\* 12V, 8.5Ah battery based on alkaline C cells*

# SkyWave Network Coverage

\* 25-byte messages in mobile applications have reduced coverage

# DMR-800D Satellite Terminal

**SkyWave**

## Integrated

- Satellite modem
- Antenna
- GPS receiver
- Script engine
- Input/Output (4)
- Geo-fence
- Data logger
- Visual diagnostic LEDs

## Rugged Construction

- Durable plastic
- Water resistant
- - 40C to + 70C operating temperature range
- IP-56/NEMA-4X

## Enhanced Performance

- 5 degree elevation angle
- 50% Lower sleep current
- 2x processing power

## Compact

- 160 mm diameter
- 55 mm height (D)

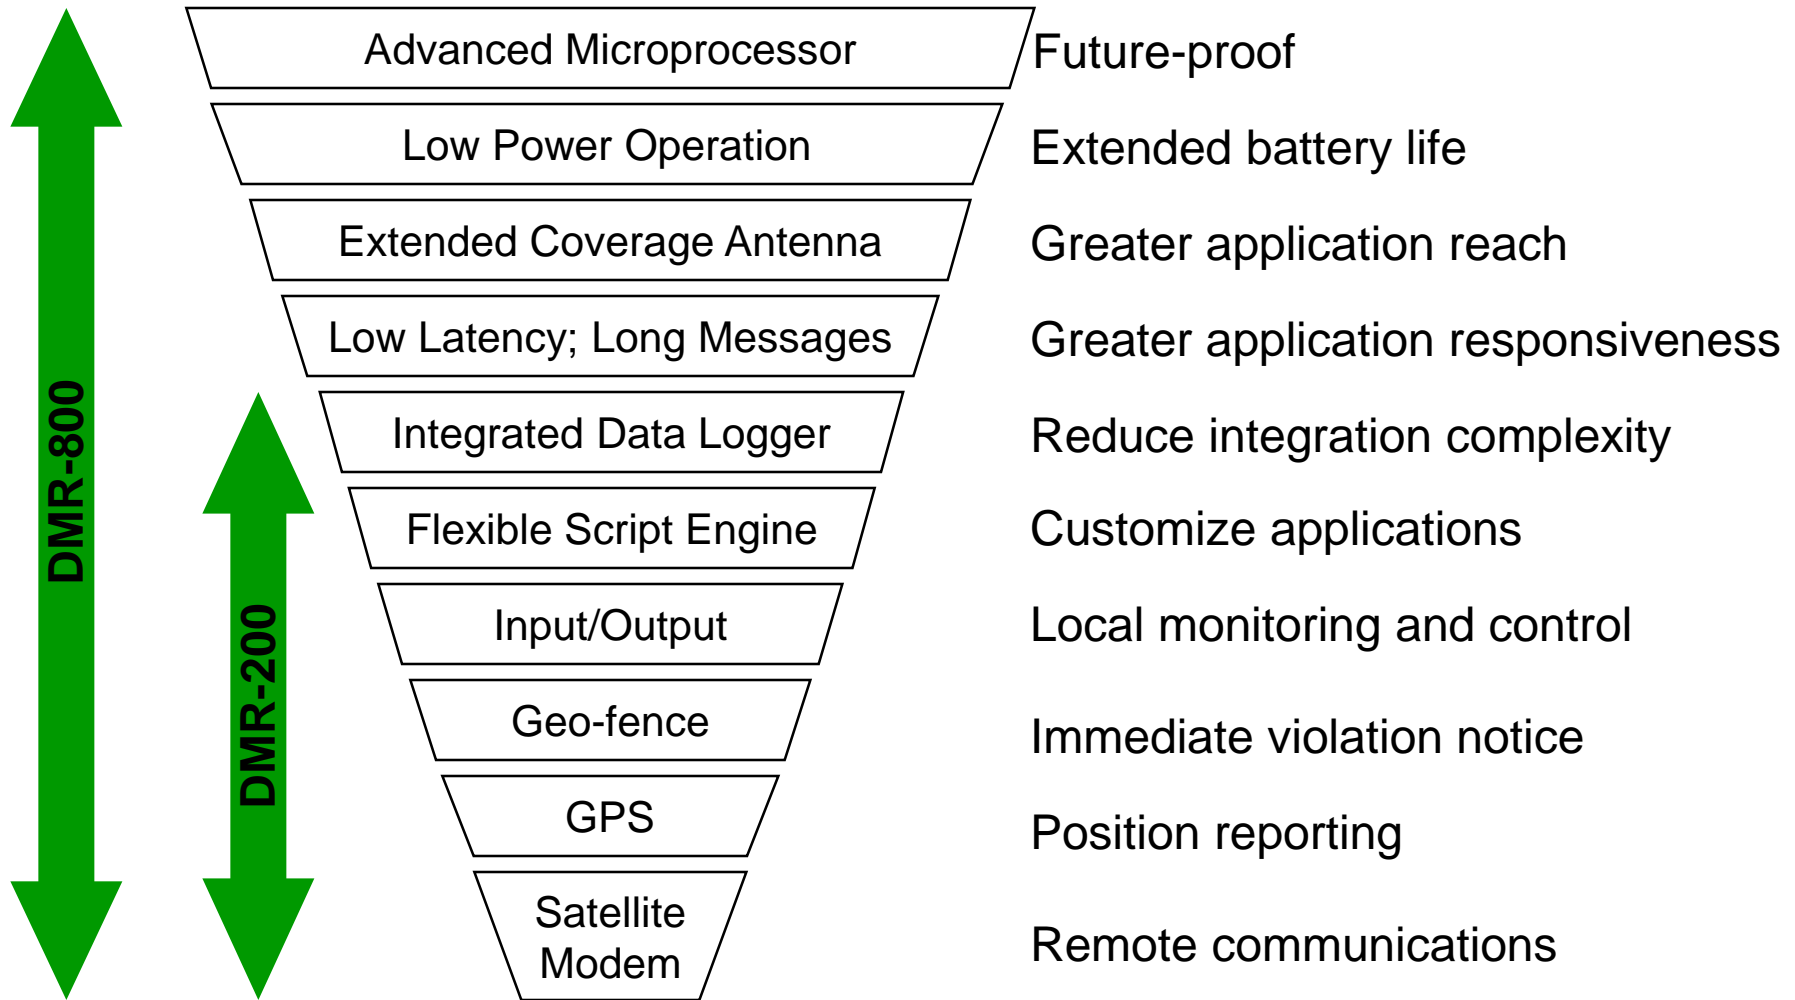

## Connector Access

- Side
- Bottom

# DMR-800D Features & Benefits **SkyWave**

- Security applications
  - Faster response in mission critical situations
    - Lock doors
    - Block engine
    - Dispatch police

- Tracking applications
  - Fast-response polling
  - Enables near real-time tracking

?

- Tracking Applications

- More position reports for lower total cost

- Freeform Text Messaging

- Up to 33 characters from driver
- Up to 133 characters to drivers
- Broadcast capable
- Better coverage than SMS\*
- Often lower cost than SMS\*

\* When roaming, delay and cost increase with SMS

# Low latency benefit for Marine **SkyWave**

- Query ship between position reports
  - 'Ping' response in almost 1 minute
- Efficient power use
  - Faster to send when waking up from sleep
  - Stay awake less time for to-terminal message

D+  
Wake-up

IsatM2M  
Wake-up

- Buoys
  - More accurate information for fishing or weather detection
  
- Text Messaging
  - Up to 33 characters from ship
  - Up to 133 chars. shore-to-ship
  - Ship-to-ship, broadcast options
  - Often lower cost than SMS\*

\* When roaming, delay and cost increase with SMS

## ■ Buoys

- Extends service life
- Reduces primary battery cost

## ■ Ships

- Tracking continues longer if power fails
- Reduces backup battery cost

- Near real-time data
  - More measurement and monitoring accuracy
  
- Control systems
  - Low-cost SCADA
  - Remote maintenance
  - Mission-critical applications

# Large Message Benefit for Fixed

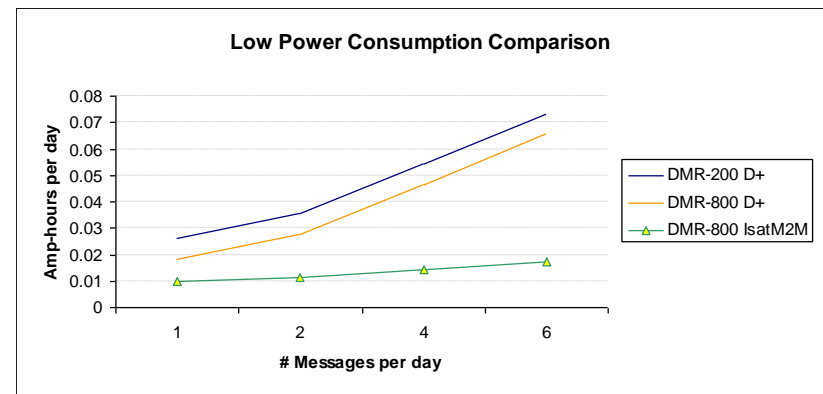

- Accurate monitoring
  - More data per report
  - Faster, lower cost than sending 2-3 messages

- Up to 25% lower cost
  - Consolidate multiple small reports

- Rechargeable units
  - Smaller, lower cost solar panels
  
- Primary battery power
  - Lower cost battery
  - Less maintenance = lower operating cost

- SkyWave D+ continues to operate and provide high quality of service and reliability
- DMR-200 D series terminals continue to be sold and to support existing applications
- Firmware upgrade will enable DMR-200 D series terminals to support IsatM2M
- DMR-800 is an enhanced satellite terminal
  - Enables IsatM2M and D+
  - 100% compatible with D+

# Upgrading to Support IsatM2M **SkyWave**

---

- DMR-200 “D series” (D/L/S/OEM) continue to support SkyWave D+
  - DMR-800D is enhanced for new business opportunities
  - Free firmware upgrade to support IsatM2M (activation charges apply) available towards end of 2007
- SureLinx 8100 continues to support SkyWave D+
  - Free firmware upgrade to support IsatM2M (activation charges apply) available Sep 2007

- SkyWave IsatM2M enhances D+ applications
  - 4x improved latency
  - Over 2x low-power efficiency
- More data, faster = more money from applications
  - Larger payload: from Monitoring to Logistics
  - Improved latency: from Measurement to Control
- SkyWave IsatM2M builds on your D+ business
  - Preserves your DMR-200 and SureLinx investments
- SkyWave D+ and DMR-200 D series terminals continue to support your existing applications
